Guidance

If incorporated, this Option is used to supplement the core clause payment provisions and amend the dispute resolution provisions in order to ensure that they comply with the Construction Contracts Act 2013 (the Act). The effect of this Option is to keep all the payment and dispute resolution terms expressly within the contract and avoid additional terms being implied or imposed by the Act. This optional clause should be incorporated into the contract by including it in Contract Data as a Secondary Option as “Y(IR)1 Construction Contracts Act 2013”. In addition, Option W2 should be listed as the Option for resolving and avoiding disputes.

Y1.1 deals with definitions, and particularly dates for communications within the Option. In the Professional Service Contract, this will affect things like payment dates, the date when any payment responses may be issued, dates for triggering dispute resolution or suspension and so on.

Y1.2 In order to comply with Sections 3 and 4 of the Act, this clause introduces a process that allows the *Consultant* to make payment applications later than permitted by clause 51, and allows the *Service Manager* to react to them within the contractual framework.

The provisions in clause 51 dealing with the date payment is due and notice of payment requirements are unchanged. Clauses 50 and 51 require that all certificates or assessments that form the notice of payment need to show the basis upon which any payment has been calculated.

Y1.3 and Y1.4 To comply with Section 4(3) of the Act, these clauses set out the requirement for advising the *Consultant* of any amount to be withheld and the date by which such advice is to be issued. In the Act this is described as a response to a payment claim. Y1.4 deals with the requirements of the Act for a specific response to be given where the reason for the reduction is due to a claim for loss or damage resulting from the *Consultant's* breach of contract. These additional express requirements add to those of clause 51.

Y1.5 Under Sections 5 and 7 of the Act the *Consultant* has the right to suspend performance if it is not paid in full the amount due under the contract, unless payment is subsequently made or the matter is referred to dispute resolution. The Option provides that suspension is a compensation event if suspension is made in accordance with the Act.

Y1.6 The Act is prescriptive about the system of adjudication that it allows and the enforcement regime in the Courts anticipates only Act compliant adjudication. Therefore, the Option incorporates the rights to adjudication and the procedures in the Act. It preserves the approach to dispute resolution in Option W2 otherwise.
